17 MR. BROWN: Paul Brown.

18 I'm against the nuclear waste dump being
19 sited in Nevada. I think we're putting all our faith
20 in science and scientists are not infallible. I think
21 scientists' infallibility blew up along with the
22 Challenger space shuttle. I think the dump site is
23 unsafe. I think transporting it across the country is
24 unsafe. If we cannot guarantee that it is, the site
25 itself is safe, there is no way we can guarantee the

0052

1 transportation is safe.
